

# Norb® BUG LITE® 9 Watt

## THE “BUG LITE” LIGHT™

What is a Norb BUG LITE? It's a **Nutri-Orb**, a unique light with specialized light spectrum to help keep moths and mosquitoes away.

Like every living creature, insects have a physiology that's linked to light—from both sun and moon, and ordinary white lights tend to draw bugs toward them. The **Norb BUG LITE** leaves out the wavelengths that draw in bugs, and illuminates your home, work and camp site without being a bug magnet.

Consider using **Norb BUG LITE** at your entryways, around deck pool and patio areas, and around your campsite.

Norb “BUG LITE” LIGHT™

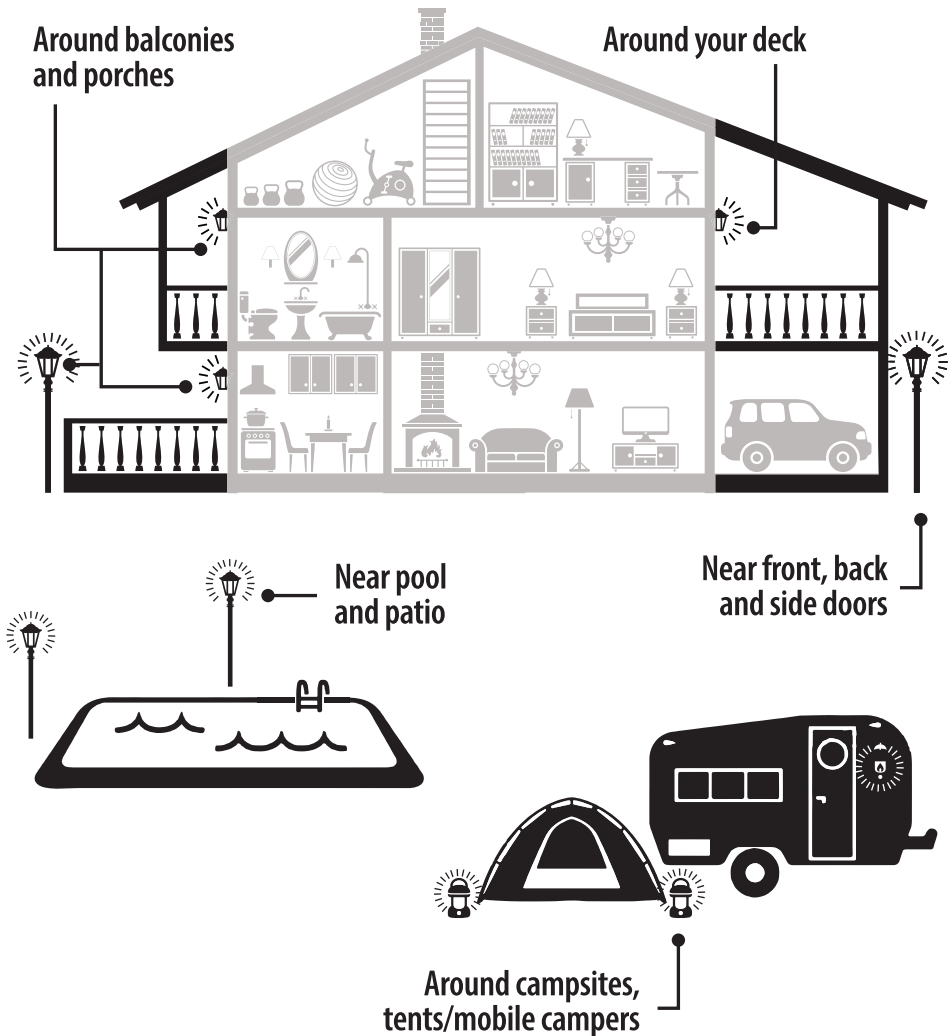

### Directions for Use Norb® BUG LITE® 9 Watt

The **Norb BUG LITE** has a specialized light spectrum where the wavelengths of light that “draw in” bugs are intentionally left out of the light spectrum. You may still see a few bugs when using your **Norb BUG LITE**, but you should see far fewer of these pesky invaders . . . as you won't be drawing them in.

- Adapted to outdoor use, but should not be directly exposed to water (use with covered, ventilated fixtures).

## Where to Place Norb® BUG LITE® 9 Watt

WHERE	Use your <b>Norb BUG LITE</b> near your front, back and side doors, around your deck, porch, pool or patio area, and around your campsite.
WHEN	From early evening until you go in for the night or until morning if you wish.
HOW	Use at full intensity. Do not look directly into the <b>Norb BUG LITE</b> , simply use it to illuminate your space.
SOMETHING TO CONSIDER	Bugs are a pain; what is also a pain is not feeling energetic during the day and not sleeping well at night. <b>Norb</b> makes other products designed to enhance your life; <b>Norb SMILE</b> is designed to help you feel happy and healthy and <b>Norb SLEEP</b> is designed for a relaxing natural night of sleep. You may find them helpful in meeting your overall illumination, personal performance and wellness goals.
